Renewable Helpline

AIR SOURCE HEAT PUMP CARE

Whats included in a heat pump service?

A full 12-point check

A real service is far more than a quick look. Here's exactly what our specialists check, clean and optimise — every visit, with a written report to back it up.

1 Refrigerant & water side

- √ Operating pressures & performance
- √ Refrigerant leak check (F-Gas certified)
- √ Flow temperatures & efficiency
- √ Glycol / antifreeze strength & top-up
- √ System pressure & expansion vessel
- √ Filters & magnetic filter cleaned

2 Electrics, unit & report

- √ Electrical connections & safety devices
- √ Controls, weather compensation & sensors
- √ Firmware & error-log review
- √ Outdoor unit, coils & fan cleaned
- √ Condensate drain cleared
- √ Full safety check + written report
